MEMORANDUM FOR: Mr. John McMahon
Deputy Director
Central Intelligence Agency

SUBJECT : Computer Security Project

STAT

I fully endorse the scope of project which addresses my security concerns, specifically in the area of computer security.

STAT

As you are aware, INR is just getting off the ground floor in implementing automated systems. However, a possible candidate qualifying as a "critical system" might be INR's Information Handling System (INR/IHS). This system provides electronic dissemination of SCI material to INR analysts who have the option of viewing the material on a CRT or producing a hard copy as required.

If after your review, our system is identified and designated as critical, my staff will actively participate in supporting effort in providing any additional information you may require. Again, you have my personal support in this important effort.
